

SUMMARY

Eager to kickstart a rewarding career in the IT industry, leveraging problem-solving skills and innovative thinking to contribute to cutting-edge projects and drive advancements in the field of computer science. Passionate and adaptable recent Computer Science graduate seeking to leverage my strong programming skills and development experience in a dynamic tech environment. Eager to contribute to innovative projects and continue learning while actively participating in creating cutting-edge technologies.

EDUCATION

Arya College Of Engineering And IT

Bachelor's Of Technology in Computer Science
2021 – 2024

Govt. Polytechnic College Dwarahat

Diploma In Computer Science
2018 – 2021

Govt. Inter College Uttamsani

Higher Secondary Education (Class12th)
2017 – 2018

Govt. Inter College Uttamsani

Secondary School Education (Class 10th)
2015 – 2016

SKILLS

- Programming Languages: Java, JavaScript, Python
- Web Development: HTML, CSS, JavaScript, ReactJS, Bootstrap, tailwind
- Back-End Development: Node.js, Express.js
- Database: MySQL MongoDB
- Tools: Git, VS Code, IntelliJ Idea
- Strong problem-solving and analytical abilities
- Excellent teamwork and communication skills

HOBBIES

- Playing chess to enhance strategic thinking.
- Exploring different cuisines as a food enthusiast.
- Listening to music for relaxation and inspiration.

CERTIFICATIONS

- Python Certification From Slog Solution (Dehradun)
- Front-End Development Certificate Program from Udacity.
- Java Certification from PrepInsta.
- React JS Certification from Codedamn.

PROJECTS

Library Management System

- Developed a comprehensive library management system using C# (.NET) and MySQL database.
- Implemented features for book tracking, user management, and borrowing history.

Netflix Clone

- Created a Netflix clone using ReactJS, showcasing skills in front-end development and UI design.
- Integrated API calls to fetch and display movie data dynamically.

News Application

- Developed a responsive news application using React and REST API integration.
- Implemented features for real-time news updates and category filtering.
- Fetch multiple category of news using NEWS API.

Chat Application (Android)

- Designed and implemented a Java-based chat application for Android devices.
- Enabled real-time messaging between users with a user-friendly interface.
- For storing the user information and multiple chat of the user we use firebase Database to store data and authenticate the user.

Hotel Booking Application

- An application which is help to find the hotel in a city or state.
- Create an online database to access hotel and user.
- Strong database connectivity using mongo-DB Atlas. We can access data anywhere from the world using internet
